

## The Turkish Energy Market Regulatory Authority has Published the Board Resolution Allowing Licensed Energy Generation For Self-Consumption Within Free Zones

*17 Aug 2023*

The board resolution of the Energy Market Regulatory Board dated 20 July 2023 and numbered 32259 ("**Board Resolution**") was published in Official Gazette dated 25 July 2023 and numbered 32259. Thus, it has been decided to grant a pre-license or generation license to legal entities seeking to engage in electricity generation activities in free zones only to meet their own electrical energy needs, provided that a positive opinion is given by the Ministry of Commerce. It is prohibited to sell electrical energy exceeding the need to be generated in facilities that will operate with a pre-license or generation license.

The full text of the Board Resolution is available at this [link](#). (Only available in Turkish)
